

CAREER OBJECTIVE

To secure a role that allows me to apply my creativity and enthusiasm in driving organizational excellence. Passionate about contributing to a collaborative team environment, fostering innovation, and delivering meaningful, impactful results that align with the organization's strategic vision.

PROFESSIONAL SUMMARY

Accomplished Java developer with 12 years of progressively responsible experience in software development, dedicated to delivering innovative solutions and driving product efficiency. Highly adaptable to emerging technologies and industry best practices, with a proven track record of diagnosing complex issues and implementing effective resolutions. Equally adept at working independently or as part of a collaborative team to achieve project goals and deliver exceptional results.

PROFILE

- Over 12 years of comprehensive experience in Object-Oriented Programming with proficiency in Java and J2EE technologies.
- Expertise in building scalable and robust web applications utilizing Spring Framework, Spring MVC, Hibernate, and HDIV Security Framework.
- Knowledge in GIT, Maven
- Solid understanding of Object-Oriented Programming in Java
- Experience in developing Web Applications with various Open-Source frameworks: Spring Framework, Spring MVC, and Hibernate.
- Strong Knowledge in HTML, CSS3; jQuery Framework.
- Demonstrated strength in debugging, troubleshooting, and risk identification, with a proactive approach to crafting innovative solutions.
- Experience in designing and developing web-based applications with expertise in responsive frameworks such as Bootstrap, Skeleton, and Foundation.
- Identifying risks proactively and proposing solutions to resolve them.
- Analytical, good at problem solving and excellent in maintaining interpersonal relationship.
- Ability to understand the problem and providing a fix for the same.
- Skilled in interpreting functional requirements, devising optimal solutions, and resolving issues with efficiency and precision.
- Successfully led and delivered complex software projects, managing teams to achieve objectives within deadlines and maintaining high standards of quality.

EDUCATION

- Bachelor's in information technology at Dr. N.G.P. Institute of technology, Coimbatore – affiliated to Anna University in 2013. Secured first division with 7.8 CGPA (scale of 10.0).
- Diploma in Computer Technology from Christ the King Polytechnic College, Coimbatore under Board of Technical Education in 2008. Secured first division with 74% marks.

SKILL OVERVIEW

Programming Languages	Java, HTML
Web Development Tools and Scripting Languages	Spring, Spring Boot, REST, Microservices, JavaScript, jQuery, Bootstrap, Apache Tiles; GIT, Eclipse, Spring Tool Suite, IntelliJ, Visual Code Studio
DevOps and Cloud Tools	GIT, Maven; AppFog, CloudWays, CloudFoundary, Docker, OCP
Databases	Oracle, MySQL, MongoDB, H2-In memory
Analytical Tools	Splunk, Kibana, AppDynamics, Grafana, AppWatch
Project Management & Ticketing tool	JIRA, Target Process; ServiceNow, Remedy

PROFESSIONAL EXPERIENCE

Infosys Ltd - (FEB 2023 – Present) – Senior Consultant

Client: Banking

Project: Manage My Accounts

As a core component of the digital banking platform, the "Manage My Accounts" module streamlines customer information management by enabling seamless updates to phone and email details, performing Know Your Customer (KYC) refreshes, and generating account statements.

Key Contributions:

- Leveraged Agile methodologies to ensure iterative and efficient delivery of software applications.
- Analyzed business requirements and functional specifications for the "Manage My Accounts" module to align development with client objectives.
- Championed best practices in software design, development, and quality assurance.
- Diagnosed and resolved production and non-production application issues, minimizing downtime, and enhancing system reliability.
- Collaborated with cross-functional teams to deliver secure, scalable, and high-performance application enhancements.
- Developed and maintained RESTful APIs to facilitate seamless integration with internal and external systems.
- Conducted comprehensive code reviews to ensure superior code quality, adherence to standards and maintainability.
- Ensure quality assurance of the deliverables through rigorous testing and defect resolution.
- Supported deployment processes, including building CI/CD pipelines, troubleshooting issues, and ensuring smooth releases.
- Provided mentorship to junior developers, fostering skill enhancement and knowledge sharing.
- Monitoring application logs and implemented fixes for critical issues in real-time.

This role underscored my expertise in end-to-end development, production support, and team leadership in a high-stakes financial environment.

Tata Consultancy Services - (JAN 2022 – Feb 2023) – Associate Consultant

Client: Tele communication

Project: Network Design Administration

The "Network Design Administration" application automates network design processes, eliminating manual documentation and streamlining the workflow for network engineers.

Key Contributions:

- Adopted Agile methodologies to ensure efficient and iterative software development.
- Analyzed business requirements and functional specifications to deliver solutions aligned with client needs.
- Promoted best practices, quality assurance, and consistency throughout the design and development lifecycle.
- Identified and resolved both production and non-production application issues, improving operational reliability.
- Led and managed a team of 11 members, ensuring successful project delivery and team collaboration.
- Conducted code reviews to maintain high standards of code quality, readability, and maintainability.
- Ensured rigorous quality assurance of all deliverables through comprehensive testing and defect resolution.

This role highlighted my ability to lead teams, implement efficient development practices, and deliver high-quality solutions to optimize network design processes.

Cognizant Technology Solutions - (SEPT 2019 – JAN 2022) – Associate

Client: Stock Market

Project: Exchange Manager

The "Exchange Manager" project facilitates seamless data exchange between the Admin System and the Employee Stock Plan Portal. This process, conducted either manually or through automation, includes data file creation at the Admin System and subsequent file processing or data loading at the Employee Stock Plan Portal.

Key Contributions:

- Applied Agile development methodologies to ensure timely and efficient delivery of software solutions.
- Analyzed business requirements and functional specifications to design and implement tailored solutions.
- Championed best practices in software design, development, and quality assurance throughout project phases.
- Diagnosed and resolved production and non-production application issues, ensuring system stability.
- Conducted coding, integration testing, and debugging to identify and address root causes of technical issues.
- Provided technical support, resolving day-to-day issues, and optimizing system performance.
- Designed and implemented new features, with thorough unit testing using JUnit to validate functionality.
- Collaborated with the QA team to support testing across multiple environments, ensuring defect-free deliverables.
- Focused on performance enhancements and managed entity associations, including one-to-many and many-to-one relationships.
- Provided critical production rollout support to ensure seamless deployment.
- Led a team of 6 members, fostering collaboration and ensuring successful project execution.

This role emphasized my expertise in data integration, performance optimization, and team leadership within a high-stakes stock market environment.

Infosys Technologies - (SEPT 2015 –AUG 2019) - Technology Analyst

Client: Insurance

Developed and maintained multiple enterprise-grade applications for the insurance domain, focusing on seamless integration, data transformation, and efficient management of customer coverages

Project 1: Global Sales and Servicing Platform

Description: Designed as a loosely coupled application using Spring Boot microservices, this platform acts as an intermediary between Salesforce and various downstream systems.

Project 2: Enterprise Integration Platform

Description: Facilitates seamless communication between upstream and downstream systems by transforming requests and responses into formats acceptable to respective endpoints.

Project 3: MetLink Portal

Description: A web-based application used for enrolling, updating, and terminating employee coverages for various customers.

Key Contributions:

- Developed an internal dashboard using Spring Boot microservices to monitor application health.
- Built a tool for generating complex Splunk queries using the Splunk SDK Java API, enhancing operational insights.
- Created and optimized JavaScript code for multiple application modules, ensuring enhanced interactivity and usability.
- Successfully handled multiple assignments under pressure, consistently meeting deadlines.
- Troubleshoot issues through a ticketing system, ensuring prompt resolution and minimizing downtime.
- Coordinated with third-party vendors during business-critical changes and deployments, ensuring smooth transitions.
- Proactively identified risks and proposed effective solutions to mitigate potential impacts.
- Provided regular status updates to onsite and offshore leads through comprehensive weekly reports.
- Investigated and resolved system abends while offering detailed informational support to application stakeholders.
- Managed daily workloads using Maestro, ensuring timely starts of downstream feeds and expediting delays.

- Identified manual processing deficiencies, and instituted automation techniques which reduced manual work and increased workflow efficiency.
- Automated manual processes, reducing labor-intensive tasks and significantly increasing workflow efficiency.
- Monitored and triaged production system alerts, offering immediate support for priority system outages.
- Conducted disaster recovery tests to validate system availability and functionality.
- Managed resource allocation for a team of 8 associates, ensuring 24x7x365 operational coverage.

This role showcased my ability to develop robust applications, optimize operational workflows, and lead teams in dynamic, high-pressure environments.

Aosta Software Technologies India Limited - (JULY 2013 – AUG 2015) - Associate Developer.

Client: Education

Project: CAMPUS MANAGEMENT SYSTEM.

Developed a comprehensive application to streamline the day-to-day operations of educational institutions, covering key functionalities such as payments and receipts, course and hostel admissions, student attendance tracking, library management, and human resource operations.

Key Contributions:

- Integrated Bootstrap Framework with Spring for a rich user interface and used Apache Tiles for seamless navigation.
- Implemented user role management, enabling CRUD operations and role-based menus and services.
- Developed a student web portal for enhanced user accessibility and functionality.
- Utilized HDIV Security API for secure application access and Apache POI API for dynamic data handling.
- Delivered user-customizable themes and settings, including personalized alerts and confirmation windows.
- Designed a course admission module incorporating sanctioned seat logic based on university criteria.
- Created interactive dashboards using Highcharts JavaScript API for easy analytics and reporting.

This role demonstrated my ability to build secure, user-friendly applications with a focus on scalability and functionality tailored to the unique needs of the education sector.

COURSE & CERTIFICATIONS

	Oracle Cloud Infrastructure Foundations 2021 Certified Associate Oracle University Credential ID: 825E4754A10CD0ED1B2B2AA7B698CF7DE06C1C34D251F085848D6DE9D2D6DFBB M220J: MongoDB for Java Developers MongoDB University Credential ID: 8916a600-e6ca-489c-8539-2754ca41f831 M001: MongoDB Basics MongoDB University Credential ID: 37a253c8-6073-405e-b26f-e508e7a6ca96
	Master Microservices with Spring Boot and Spring Cloud Udemy Credential ID: UC-210e40dc-a564-4b86-8ccf-2f76cf71608f
	Modern Java - Learn Java 8 features by coding it Udemy Credential ID: UC-c59ff18a-e449-4a22-ad2e-b6cbe5a0cf0d

PERSONAL INFORMATION

Name	Prasanna Sundaram
Father’s Name	Sundaram Seetharaman
Date of Birth	16-06-1990
Nationality	Indian
Gender	Male
Marital Status	Single
Languages Known	English; Tamil; Kannada
Permanent Address	48/1 F1, Sai Apartment, 2 nd Main Road MC Nagar, Chitlapakkam, Chennai (TN) -600 064

DECLARATION

I, Prasanna Sundaram, affirm that the information provided herein is accurate and truthful to the best of my knowledge and belief.
